**Thank you for considering Siber
Circuits for your printed circuit
board needs.**

Since Siber Circuits' inception in 1988, we have continuously gained market share by providing our customers with high quality circuit boards that meet or exceed their expectations for *quality, service, and delivery*. Siber Circuits has an excellent blend of experience and employs new technologies and processes.

Over the years we have remained dedicated to details. The printed circuit board is the single most important component in an electronic assembly. We are constantly upgrading our certifications to stay ahead of the industry. At Siber Circuits we take this responsibility seriously, whether your board needs are small quantities, or in the thousands.

Siber Circuits is proud to be ISO 9002 and UL certified. As Siber circuits continues to expand, we continue to strive to produce a higher quality board and a better ability to work with you, our customer.

We are motivated by excellence and absorbed by technology and quality control.

We will provide you with a Printed Circuit Board that you know you can depend on.

Our commitments to our customers are:

100% Quality Assurance

On Time Delivery

Competitive Pricing

Customer Driven Service Department

From Prototype Engineering requirements to your large production quantities, Siber Circuits is committed to you, our customer. We supply our customers throughout North America with product up to 30 layers in a variety of materials and technologies.

Our goal is to be:

“Your Printed Circuit Board Solution”

We work with our customers from both aspects of “Design for Manufacturability” along with your needs to improve your “Design for Cost”.

We look forward to the opportunity to fulfill your printed circuit board needs. You are cordially invited to our facility to discuss your requirements. Again, thank you for your interest.
